Harvard College was founded in 1636 in Cambridge, Massachusetts, as an institution from which the leadership of church, state, and trade was expected to emerge. Today Harvard has evolved into a major university with a multitude of faculties, students, facilities, and purposes.

There are over 3,800 international students currently enrolled in the various schools and departments at Harvard. More than 3,600 scholars from abroad are teaching and pursuing research or other advanced studies either as affiliates of the various graduate schools, or as associates of one of the many international institutes. International visitors often are surprised to find that a university of such size and scope is not centrally governed by a single administrative organization. Harvard’s organizing style is the opposite. While the ultimate authority rests with the President and the Governing Boards of the University, many of the crucial decisions about curriculum and student life are delegated to the faculties that oversee Harvard College, the graduate schools, and the Division of Continuing Education. Each faculty is headed by a dean appointed by the President, and each is directly responsible for its own finances and organization. The decentralized model is at once Harvard’s most liberating feature from an administrative point of view, and also its most perplexing characteristic when approached from an international perspective. Students and scholars from other countries will find that their first task is to determine which division of Harvard University would provide them with the education they are seeking, and then to learn the best way to obtain the information necessary to apply for admission.

WHERE IS HARVARD?

Harvard University is located in Cambridge, Massachusetts, a traditional New England city with a population of over 100,000. Cambridge offers its vibrant student community a variety of bookstores, street festivals, theater and music, and the world’s best selection of ice cream stores.
While Cambridge is the home of Harvard College, the graduate schools of Business, Dental Medicine, Medicine, and Public Health are located in the city of Boston. In this large metropolitan seaport there is a vast student presence, with more than 50 colleges and universities located in the Boston area. A commercial center for banking, insurance, and health care, Boston is a city rich in ethnic, political, and cultural traditions. Cultural and recreational activities include symphony and rock concerts, repertory theater, and Broadway previews, museums, and galleries, and professional sports teams. Close to the ocean, the mountains, and the countryside, Boston is easily accessible by public transportation, and seems to offer something for all.

What Does Harvard Offer?

Libraries: Harvard has the oldest library system in the United States and the largest university library in the world. Over 15 million volumes are distributed among the major central libraries, residential houses, departments, professional schools, and special collections.

Laboratories: There are more than a dozen major buildings for teaching and research in the natural sciences, which include the Science Center with its five large lecture halls, 20 classrooms, faculty offices, computer terminals, library space and lab space. Departmental laboratories include the Mallinckrodt and Conant Chemical Laboratories, the Jefferson and Lyman Laboratories of Physics, the Biological Laboratories, the David and Arnold Hoffman Laboratory of Experimental Geology, Pierce Hall (Applied Physics), the Gordon McKay Laboratory of Engineering and Applied Physics, the Maxwell Dworkin Building, and the Smithsonian Astronomical Observatory. New facilities include the Harvard Stem Cell Institute and the Broad Institute of Harvard and MIT.

Museums: For study and exploration there are the Botanical Museum, the Mineralogical Museum, the Semitic Museum, the Museums of Archaeology and Ethnology, and Comparative Zoology. Harvard museums of art include the Fogg, the Sackler,
the Carpenter Center for the Visual Arts, and the Busch-Reisinger Museum.

Theaters: The Loeb Drama Center’s 550-seat auditorium and experimental theatre are used by undergraduates and by the American Repertory Theatre as performance and teaching facilities. Productions also take place in the New College Theatre, and in Sanders Theatre, Agassiz Theatre, in the college residences, and elsewhere on campus.

Harvard International Office (HIO): The Harvard International Office is part of the Central Administration and offers services to international students in all the faculties of the University, once they have been admitted to Harvard. Its staff provides information on visa and immigration regulations, and offers pre-arrival and arrival information and programs to minimize the difficulties students and their families may experience. The HIO staff offers a friendship and hospitality program for new international students. Its website address is: www.hio.harvard.edu.

Applying to Harvard

Specific instructions and deadlines for applying to Harvard College and each graduate or professional school are provided by the admissions office of each individual school. Candidates from overseas are encouraged to begin the application process early to ensure that they can meet Harvard application deadlines. Most graduate school application deadlines are in mid-January. Visit Harvard’s main website, www.harvard.edu, for information about applying to Harvard.

A bachelor’s degree or its equivalent, earned at a college or its equivalent either in the United States or overseas, is normally required for entrance to any of the graduate or professional schools. There is no central admissions department which handles inquiries or applications for all the schools within the University. Each school has its own admissions office, application forms, and procedures. A degree from Harvard College does not guarantee admission to one of the graduate or professional schools.
English Proficiency
International students enrolled at Harvard University must be able to read English with ease, to understand rapid, idiomatic English as spoken in lectures and group discussions, and to express thoughts quickly and clearly in spoken and written English. A student who is not proficient in English at the time of application should not apply for admission. Applicants whose native language is not English or who have not graduated from an English-speaking university may be required to take the Test of English as a Foreign Language (TOEFL). Applicants should consult each individual school about test requirements and minimum acceptable scores. Information about the test is available from TOEFL agents outside the United States, or from TOEFL, Box 6151, Princeton, NJ 08541-6151 USA (www.toefl.org).

Standardized Tests
Please request information from the specific school to find out what standardized tests are required to complete an application. It is important for international candidates to register well in advance of a given test date. If information on registration procedures and test dates is not available in a given country, write to the Educational Testing Service, Box 955, Princeton, NJ 08541 USA (www.ets.org).

Harvard College
The College offers a superb liberal arts program leading to the first (bachelor's) degree. The course of study is ordinarily four years, with over 40 fields of concentration. In addition to in-depth study in one field, students broaden their education through the Core Curriculum and additional electives. Some of the fields of concentration are:

- African and African American Studies
- Anthropology
- Applied Mathematics
- Astronomy and Astrophysics
- Biochemical Sciences
- Biology
• Chemistry
• Chemistry and Physics
• Classics
• Comparative Literature
• Computer Science
• Earth and Planetary Sciences
• East Asian Studies
• Economics
• Engineering Sciences
• English and American Literature and Language
• Environmental Science and Public Policy
• Folklore and Mythology
• Germanic Language & Literature
• Government
• History
• History and Literature
• History of Art and Architecture
• History of Science
• Linguistics
• Mathematics
• Music
• Near Eastern Languages and Civilizations
• Philosophy
• Physics
• Psychology
• Romance Languages and Literature
• Sanskrit and Indian Studies
• Slavic Languages and Literatures
• Social Studies
• Sociology
• Special Concentrations
• Statistics
• Study of Religion
• Visual and Environmental Studies
• Women’s Studies
Please note that Harvard does not offer undergraduate degrees in architecture, business, communications, journalism, law, or medicine.

Application deadline: January 1. Test requirements: Results of SAT I or ACT with writing and three SAT II Subject Tests are required for all candidates. Students are not required to submit the Test of English as a Foreign Language (TOEFL) unless they are applying from a country without access to SAT or ACT testing. Candidates whose native language is not English should not take one of their three SAT II tests in their native language.

THE GRADUATE SCHOOL OF ARTS AND SCIENCES

The Graduate School of Arts and Sciences (GSAS) offers the following degrees: the Master of Arts (AM), Master of Science (SM), Master of Engineering (ME), Master of Forest Science (MFS), and the Doctor of Philosophy (PhD) in more than 50 divisions, departments, and committees, from African American studies to Statistics, including several interfaculty programs. Students may also obtain a coordinated JD/PhD through GSAS and Harvard Law School and an MD/PhD through GSAS and Harvard Medical School. References to “departments” in the following sections are meant to indicate any degree-granting unit, as appropriate.

• African and African American Studies
• Anthropology
• Architecture, Landscape Architecture, and Urban Planning
• Astronomy
• Biological and Biomedical Sciences
• Biological Sciences in Dental Medicine
• Biological Sciences in Public Health
• Biology: Immunology
• Biology: Molecular and Cellular
• Biology: Neuroscience
• Biology: Organismic and Evolutionary
• Biology: Virology
• Biophysics
• Biostatistics
• Business Economics
• Celtic Languages and Literatures
• Chemical Biology
• Chemical Physics
• Chemistry and Chemical Biology
• Classics
• Comparative Literature
• Earth and Planetary Sciences
• East Asian Languages and Civilizations
• Economics
• Engineering and Applied Sciences
• English and American Literature and Language
• Forestry
• Germanic Languages and Literatures
• Government
• Harvard Integrated Life Sciences
• Health Policy
• History
• History of American Civilization
• History of Art and Architecture
• History of Science
• Information, Technology, and Management
• Inner Asian and Altaic Studies
• Linguistics
• Mathematics
GSAS offers two options for study within a non-degree program, the Special Student status and the Visiting Fellow status. Special Student status is available to individuals who have sound reasons for not wishing to enter a degree program, who hold bachelor's degrees or its equivalent, and are able to present evidence of fitness for admission at the graduate level. Persons holding doctoral degrees (or their equivalent), or those with comparable professional experience, may apply for Visiting Fellow status. This status is also open to advanced doctoral candidates who have completed all required coursework and would like to pursue dissertation research at Harvard.

HARVARD SCHOOL OF ENGINEERING AND APPLIED SCIENCES

Having had a long history in the field of engineering and applied sciences with different names, beginning in 1847 as the Lawrence Scientific School, Harvard School of Engineering and Applied Sciences (HSEAS) was named in 2007 to acknowledge the renewal and growth engineering and sciences have experienced in recent years at Harvard. HSEAS serves as the connector and integrator of Harvard's teaching and research efforts in engineering, applied sciences, and technology.

Graduate Areas: Applied Mathematics, Applied Physics, Bioengineering, Computer Science, Electrical Engineering, Environmental Sciences and Engineering, Mechanical Engineering

Collaborative Graduate Programs: Engineering and Physical Biology (with faculty of Arts and Sciences); Science, Technology and Management (joint with Harvard Business School); Medical Engineering and Medical Physics (Harvard/MIT Division of Health Sciences and Technology); Systems Biology (joint with Harvard Medical School and through the Harvard Integrated Life Sciences Programs)
Prospective undergraduate students apply through Harvard College Admissions Office (See Harvard College). Prospective graduate students apply through the Graduate School of Arts and Sciences (See GSAS). For more information please refer to www.seas.harvard.edu.

HARVARD BUSINESS SCHOOL

Harvard Business School (HBS) was founded in 1908. It is located on the Boston side of the Charles River, on a 40-acre, 33-building campus not far from Harvard Square. The School offers a full-time, two-year Master of Business Administration (MBA) program and nine doctoral programs (DBA and joint-PhD). The DBA programs include: accounting and management, marketing, management, strategy, and technology and operations management. The four joint-PhD programs with the Graduate School of Arts and Sciences include: Business Economics; Health Policy (Management); Organizational Behavior; and Science, Technology and Management.

The MBA program also has joint programs with Harvard Law School, Harvard Medical School, and the Kennedy School of Government. In addition, there is a large portfolio of Executive Education programs designed to strengthen the leadership capacity, knowledge, and skills of participants.

HARVARD GRADUATE SCHOOL OF DESIGN
The Graduate School of Design (GSD) offers students the opportunity to develop their potential for excellence in design of the physical environment and for leadership in professional practice, teaching and research. The GSD offers studio-based Master’s degree programs, ranging from 1 1/2 to 3 1/2 years, in architecture, landscape architecture and urban planning, and urban design. A 1 1/2-year Master in Design Studies provides a non-studio-based program. Two types of doctoral programs in design fields are also offered.

Harvard Divinity School

Harvard Divinity School is committed to educating women and men for service as leaders in religious life and thought both as ministers and teachers, and in other professions enriched by theological study. Students and faculty representing over 55 religious denominations and strikingly diverse ethnic, cultural, and religious backgrounds engage in rigorous historical and comparative study of Christian traditions in the context of other world religions and value systems.

The degree programs include the two-year Master of Theological Studies, the three-year Master of Divinity, the one-year Master of Theology, and the Doctor of Theology. Special resources, such as the Women’s Studies in Religion Program, the Center for the Study of World Religions, the Program in Religion and Secondary Education, and the offerings of the Boston Theological Institute, enhance the School’s curriculum.

Harvard Graduate School of Education

Since its founding in 1920, the Harvard Graduate School of Education (HGSE) has been training leaders to transform education in the United States and around the globe. Its mission is to prepare future leaders in education practice, policy and research, as well as generate knowledge to improve student opportunity, achievement, and success.
HGSE offers programs leading to the Doctor of Education degree (Ed.D.) and the Master of Education degree (Ed.M.).

The Doctor of Education degree prepares leaders to understand research, policy, and practice, as well as the relationships among them. Graduates assume roles as university faculty members, senior-level educational leaders, policymakers, and researchers. HGSE offers six concentrations within the single doctoral program:

- Culture, Communities, and Education
- Education Policy, Leadership, and Instructional Practice
- Higher Education
- Human Development and Education
- Quantitative Policy Analysis in Education
- Urban Superintendents Program

The Master of Education degree program is a year-long intensive program for students who wish to study a particular field in education, acquire a general theoretical background for understanding past and future field experiences, or develop skills for use in professional work in education. Program offerings include:

- Arts in Education
- Education Policy and Management
- Higher Education
- Human Development and Psychology
- International Education Policy
- Language and Literacy
- Learning and Teaching
- Mind, Brain, and Education
- Risk and Prevention
- School Leadership
- Specialized
- Teacher Education Program
- Technology, Innovation, and Education

THE JOHN F. KENNEDY SCHOOL OF GOVERNMENT
The John F. Kennedy School of Government (KSG) is a professional graduate school that works to fulfill our mission of training leaders in public service. KSG offers two-year master's degrees in public policy (MPP), public policy/urban planning (MPP/UP), public administration (MPA2), and public administration/International development (MPA/ID). In addition, it offers a one-year mid-career master of public administration (MC/MPA), as well as several doctoral programs. The Kennedy School has emerged as a forum for passionate debate about the past, present, and future of public service and governance. A number of short-term executive education programs are also offered.

For further information, please contact:
Office of Admissions, Box 93
John F. Kennedy School of Government
79 JFK Street
Cambridge, MA 02138 USA
Telephone: (617) 495-1155
Email: ksg_admissions@harvard.edu
Web: www.ksg.harvard.edu

HARVARD LAW SCHOOL
The Law School offers three degrees: the Juris Doctor (J.D.), the Master of Laws (LL.M.), and the Doctor of Juridical Science (S.J.D).
For information on the J.D. Program, please contact:

J.D. Admissions Office
1563 Massachusetts Avenue

For information on all Law School programs, please visit:

Web: www.law.harvard.edu
The Harvard Medical School (HMS) offers a medical school program, the New Pathway Program, unique for its reliance on problem-based learning, which leads to the Doctor of Medicine (M.D.) degree. The Harvard-MIT Division of Health Sciences and Technology (HST) Program, developed jointly by faculty members of Harvard and the Massachusetts Institute of Technology (MIT), is oriented towards students with strong backgrounds in quantitative science. Although the HST program is well suited for those with an interest in a career devoted to scientific investigation, the New Pathway Program provides a similarly rich preparation for an academic career. The M.D./Ph.D. Program exists for qualified applicants who wish to integrate medical school and intensive scientific training. The School also offers joint degree programs in conjunction with the School of Public Health, the John F. Kennedy School of Government, and Harvard Business School.

Clinical teaching is carried out in several general and specialized hospitals, which include Massachusetts General Hospital, Brigham and Women's Hospital, Children's Hospital, Beth Israel Deaconess Medical Center, Massachusetts Eye and Ear Infirmary, Mount Auburn Hospital, and Cambridge Hospital. The Massachusetts Mental Health Center and the McLean Hospital are psychiatric facilities associated with HMS.

HMS and its affiliated teaching hospitals offer programs in many disciplines in biomedical science and clinical medicine. Candidates interested in applying for these post-graduate positions must submit their applications to the individual program directors.

Academic work in universities outside the United States or Canada must be supplemented with at least one year of college or university training in the United States or Canada.
For further information, please contact:

Harvard Medical School
Office of the Committee on Admissions
25 Shattuck Street, Gordon Hall, Room 306
Boston, MA 02115 USA

Telephone: (617) 432-1550
Web: www.hms.harvard.edu/admissions

Additional information about the post-graduate training programs at HMS and the hospitals is available at the Office of International Medical Programs, 25 Shattuck Street, Boston, MA 02115.

HARVARD SCHOOL OF DENTAL MEDICINE

The Harvard School of Dental Medicine (HSDM) offers a four-year program leading to the Doctor of Dental Medicine (D.M.D.) degree. The goal of HSDM is the education of men and women who will assume leadership roles in the clinical practice of dentistry as well as in dental education and in oral and dental health research.

Advanced graduate programs are offered at HSDM in the following dental specialties: Dental Public Health, Endodontics, Oral and Maxillofacial Pathology, Orthodontics, Periodontics, and Prosthodontics. Graduates of these programs may earn the Master of Medical Sciences (M.M.Sc.) or Doctor of Medical Science (D.M.Sc.) degree. In addition, hospital-based residency programs are provided by Harvard at the affiliated hospitals in the following areas: Oral and Maxillofacial Surgery, Pediatric Dentistry, and General Practice Residency.

Additional advanced training programs at HSDM include Informatics, Oral Medicine, and Orofacial Pain and Temporomandibular Disorders. The School also offers joint degree programs in Oral Epidemiology (M.P.H., M.S., D.P.H. or D.Sc.) in conjunction with the Harvard School of Public Health, and Biomaterials (Ph.D.) in conjunction with the Massachusetts Institute of Technology. An interdisciplinary Ph.D. program in Biological Sciences in Dental Medicine (BSDM) is
offered through the Harvard University Graduate School of Arts and Sciences (GSAS).

For further information please contact:

Office of Admissions and Student Affairs
Harvard School of Dental Medicine
188 Longwood Avenue
Boston, MA 02115 USA

Telephone: (617) 432-1443
Fax: (617) 432-3881

Web: www.hsdm.harvard.edu

Harvard School of Public Health
The mission of the Harvard School of Public Health (HSPH) is to advance the public’s health through learning, discovery, and communication. It has four objectives: to educate scientists, professionals, and leaders for public health; to foster new discoveries and develop better technologies for improved health of individuals and populations; to inform and influence debate on key public health issues; and to strengthen capacities and services that meet health needs in the community.

HSPH offers programs leading to the following degrees: Master of Science (S.M.) and Doctor of Science (S.D.) in a specialized field, the Master of Public Health (M.P.H.), the Master of Occupational Health (M.O.H.), and the Doctor of Public Health (D.P.H.). A combined M.D./M.P.H. degree is offered for enrolled medical school students, as well as a non-residential Master of Science degree in Health Care Management for physicians who hold leadership positions in managed care settings. An integrated J.D./M.P.H. degree is offered for enrolled Harvard Law School students. Departments include Biostatistics, Environmental Health, Epidemiology, Genetics and Complex Diseases, Health Policy and Management, Immunology and Infectious Diseases, Nutrition, Population and International Health, and Society, Human Development and Health. The Ph.D. degree is awarded through the Committee on Higher Degrees in Public Health, the Division of Biological Sciences, and the Graduate School of Arts and Sciences.
The Takemi Program in International Health offers fellowships for research and advanced training on critical issues of international health, especially those related to developing countries.

For further information, please contact:

Office of Admissions
Harvard School of Public Health
158 Longwood Avenue
Boston, MA 02115-6096 USA

Telephone: (617) 432-1031
Fax: (617) 432-2009
Email: admisofc@sph.harvard.edu
Web: www.hsph.harvard.edu

Harvard Extension School
The Harvard Extension School was founded in 1909 and is now recognized as a national and international leader in continuing studies. The Extension School offers graduate professional degree programs and graduate professional certificate programs in seven competitive fields. For students who want advanced study in English before embarking on a graduate degree, the Extension School also offers a postbaccalaureate Diploma in English for Graduate and Professional Studies. International students are welcome in all of the programs that are listed below:

• Master of Liberal Arts in Educational Technologies
  Certificate in Educational Technologies
• Master of Liberal Arts in Environmental Management
  Certificate in Environmental Management
• Master of Liberal Arts in Information Technology
  Certificate in Applied Sciences
• Master of Liberal Arts in Journalism
  Certificate in Publishing and Communications
• Master of Liberal Arts in Management
  Certificate of Management
• Master of Liberal Arts in Museum Studies
• Diploma in English for Graduate and Professional Studies
Each of the above certificate and degree programs requires completion of three program prerequisite courses prior to admission. Students may take many of these courses online from outside the United States during the fall, spring, or summer term, and/or on campus in the Harvard Summer School.

The Certificate in Applied Sciences and the Certificate in Environmental Management can be completed entirely online, which may be helpful to international students who are unable or prefer not to travel to the United States. The Extension School also offers more than 100 courses online, which may be taken by students who are interested in taking individual courses from outside the United States without earning a degree, certificate, or diploma.

For further information, please contact:

Harvard University Extension School
51 Brattle Street
Cambridge, MA 02138 USA
Telephone: (617) 495-4024
Fax: (617) 496-4181
Web: www.extension.harvard.edu

**Harvard Summer School**

The Harvard Summer School offers undergraduate and graduate instruction in more than 40 liberal arts fields, as well as professional areas such as computer science, management, and museum studies. Over 200 day and evening courses are offered in one eight-week session and two four-week sessions from late June through mid-August. Intensive English language instruction is available in several full-time programs within the Summer School Institute for English Language (IEL) Programs. Each year the Summer School accepts a limited number of highly qualified high school sophomores, juniors, and seniors to the Summer School Secondary School Program. These students may enroll in nearly the full range of undergraduate courses, if they meet course prerequisites. On-campus housing is available.
For further information, please contact:
Harvard Summer School
51 Brattle Street
Cambridge, MA 02138 USA
Telephone: (617) 495-4024
Fax: (617) 495-4181
